Brainstorm & Idea Prioritization Template:

Brainstorming creates an open environment where team members share ideas to develop the UCABS Cab Booking System. The team discusses problems faced in traditional transportation and suggests digital solutions like online ride booking, real-time driver tracking, OTP ride verification, and driver KYC validation.

All ideas are encouraged and discussed collaboratively to design a platform that connects riders and drivers efficiently. This process helps the team select the best features and build a secure and user-friendly cab booking platform using the MERN stack.

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.
